

# Pool hose

Plastic pipes - MAINCOR industry

## AREAS OF APPLICATION

- Bottom vacuum cleaners
- Bottom vacuum brushes
- Sand filter housings
- Pumps
- Skimmers

## PROPERTIES

-  -40°C to +70°C
-  Material: polyethylene (PE)
-  High flexibility
-  UV-resistant (in black version)
-  Robust and step-resistant with long durability
-  Operating pressure: 1.5 bar
-  Custom-made for every requirement
-  Colour: blue, black
-  Nominal widths: 32 / 38
-  Socket division: 1.0 / 1.1 / 1.5 m

For versatile use, resistant, with long durability The MAINCOR swimming pool hose offers highest quality for every area of application. The flexible and lightweight hose made of PE material can be laid, divided and connected without problems. Its step-resistance and durability guarantee a long period of use.

The very flexible pool hose is used as suction hose for bottom vacuum cleaners or bottom vacuum brushes. It may, however, also be used as connection between the skimmer and the pool or for installing pool technology such as smaller pumps and pool filter systems.
