Corrugated pipes

Protective tubes for industrial cable protection

Corrugated pipes - cable protection

MAINCOR Industry

SHAPING THE FUTURE WITH EXPERIENCE

The longstanding experience of MAINCOR Rohrsysteme is reflected in the product area of industrial cable protection. The requirements surrounding protective tubes for cables are as divergent as our customers' areas of use. We therefore develop solutions together with you which are customized in exact accordance with your requirements.

Our protective tubes for cables offer you secure and flexible cable management and protect your leads against mechanical damage as well as a wide variety of chemicals.

PRODUCT RANGE

We offer our customers a wide-ranging offering of corrugated pipes and hoses which are used in an exceptional variety of technical systems.

Examples include:

- Mechanical engineering
- Robotics
- Construction of installations
- The commercial vehicles industry
- Electrical equipment

An exceptional range of different dimensions, materials, geometries and configurations are also possible.

CERTIFICATIONS

Our products are manufactured according to the guidelines of the FMVSS and fulfill the RoHS.

an exceptional range of different dimensions

MATERIALS

Our expertise is based on our many years of experience in the processing of raw materials, which range from polyolefins (PE, PP), to polyamides (PA-6, PA-12) and thermoplastic elastomers (TPE), through to specialist high-performance plastics.

Working closely with our raw materials suppliers, our research department develops and modifies existing materials so that it can fulfill specific customer requirements at all times.

CUSTOMER SATISFACTION

We stand for the highest level of quality and customer satisfaction. This is reflected in the development and manufacturing of our products, which are specifically aligned to our customers' requirements. Our team will be pleased to support you as your professional partner.

Thanks to the latest testing equipment such as 3D-CNC measurement machines, we continuously monitor the 0-error-principle and therefore ensure the high standard of our products.

PROPERTIES

-  -50 °C to +130 °C
-  High flexibility
-  High chemical resistance
-  Minimum bending radii
-  Customized products for all requirements
-  Corrugated pipes: Ø 4 up to 50 mm
