

MAINSILVER

– flexible antibacterial ventilation pipe

Our in-house produced MAINSILVER ventilation pipe is antibacterial, i.e. it prevents the growth of germs (bacteria). The silver ions that make our pipe antibacterial are an additive within the inner layer. This means that the product itself remains perfectly hygienic. It also extends the service life of the pipe.

Technical Properties:

Material:
polymer, modified with silver ions (Ag⁺)

External storage under direct
sunlight: max. 6 months

antistatic

min. installation length:
5 m

antibacterial

max. length of use:
15 m

Flammability:
UL 94 HB

max. continuous temperature load:
50°C

Electrical resistance [Ω]:
DIN IEC 60093 $<10^{13}$

min. operating temperature:
5°C
