

MULTILAYER COMPOSITE PIPE PRODUCTION LINE

Production line for manufacturing multilayer composite pipes (PE/Al/PE, PEX/Al/PEX) for use in sanitary, heating, air conditioning, industrial, and energy applications.

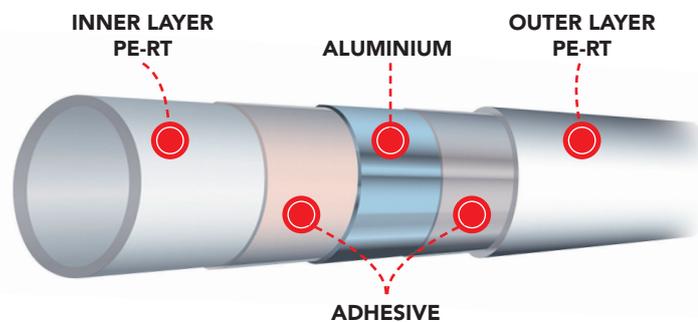

REQUEST NOW!

Aluminium overlap welding using ultrasonic technology.

APPLICATION

- drinking water installation
- radiator connection
- underfloor heating
- wall heating
- underfloor cooling
- ceiling cooling

YOUR ADVANTAGES

HIGH PROCESS STABILITY

Synchronized drives and harmonized extrusion components ensure stable pipe production.

ENERGY EFFICIENCY

Optimized drive and heating systems reduce energy consumption and operating costs.

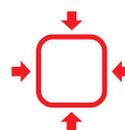

FLEXIBLE CHANGEOVER

Tool-free diameter changes and central recipe management enable short setup times.

INDUSTRY 4.0-READY CONTROL

Central platform with touchscreen, remote access, and automatic error diagnostics.

COMPACT DESIGN

Space-saving integration into existing production environments.
